

Dr. Stephanie C. Holmes, MA BCCC
Certified Autism Specialist/ NeuroDiverse Coach

Consent and Explanation of Assessment

I _____ consent on this day _____ to be assessed for autism spectrum (formerly Asperger's or High Functioning Autism) by Stephanie C. Holmes online. The purpose of the visit today is to determine if the challenges the individual named above is a result of being NeuroDivergent/Autism. By initialing the following statements, I agree that these things were explained to me before the assessment:

_____ This assessment done by Dr. Holmes and a certified autism specialist is not the same as an assessment that would be necessary for SSI/Disability or ADA accommodations at work or school. A different process is necessary for SSI assessments. A medical professional is required for SSI evaluations to determine if autism is also a disabling condition for the individual for work. This assessment is not that type of assessment.

_____ This assessment today does not mean I am entering into a client relationship with Dr. Holmes currently. Should at a later time this occur, another agreement and consent would be made. Today's assessment is an agreement of assessment only.

_____ I have been advised that a spouse/partner/other's input (parent) would be taken into consideration and agree to this condition of Dr. Holmes' assessment.

_____ Dr. Holmes explained that this assessment cannot be billed to insurance as Dr. Holmes is not a HIPAA provider or part of any insurance. One cannot bill their own and she will not bill.

_____ As this is not a full psych-eval there will not be additional paperwork provided concerning the results. Any additional written-up work is charged per hour in addition to the assessment fee.

_____ I understand that if married (and my spouse was involved in the assessment process), results will be given together for both parties to hear the results.
